31 May 2022

Message from the Guest Editors

At present, the synergy between lighting and industry, understood from the widest perspective of sustainable development, is one major issue to strengthen in modern societies. Accurate lighting in industrial activities, but also an optimal and sustainable lighting industry are necessary in order to achieve the UN Sustainable Development Goals and keep the highest standards in well-being and safety. More comprehensive studies on light and industry have to be conducted in industrial activities like textiles, sustainable food production, agriculture, automotive, and other industries as have already been done in residential, academic, medical, and commercial buildings. Further studies in various industries show that adequate intensity and uniformity for certain jobs increase production, enhance product quality, protect the health of workers, improve safety and security, reduce worker fatigue and accidents, and improve the satisfaction and mood of employees. The purpose of this Special Issue is to present the state-of-the-art and show the top advances in the lighting in industry as well as the new trends in the industry of lighting within the framework of sustainable development.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
