Message from the Guest Editor

Lighting has evolved, from a tool to ensure the safety and performance of installation users, through compliance with technical standards and regulations, to become a major discipline which has an impact in energetic, environmental and financial terms. Although the lighting community has fully understood this necessary evolution, and installation designs are concerned with the necessity of decreasing energy, raw materials, and budget consumption, without impairing user safety, we still need to expand our vision of lighting to make it really sustainable. Thus, the physical, psychological and emotional well-being of people, so closely linked to lighting, must be seriously considered in every single design in order to achieve lighting in harmony with people, the environment, as well as their mutual interactions.

The target of this Special Issue is to provide a wide framework to present advances and proposals, but also doubts and open points to which solutions will lead us to real sustainable lighting.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
