Message from the Guest Editors

Dear Colleagues,

The concept of the circular economy, an economic system designed to regenerate itself and therefore able to guarantee its own eco-sustainability, has progressively established itself both among scholars and practitioners. However, can we say that we have now entered the era of the circular economy?

The goal of this Special Issue is to explore how manufacturing companies, thanks to the support of enabling technologies, can evolve towards the model of smart and circular enterprises and what impact this transformation makes on the creation and capture of value within supply chains. Both conceptual and empirical research and case studies, aimed at validating theoretical assumptions, are welcome in this Issue.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
