Message from the Guest Editors

Green shipping not only refers to the combination of economic benefits and environmental protection in operation but also emphasizes the coordination between shipping benefits and the environment so as to ensure sustainable development. Modern science and technology are applied to the daily management of logistics and ports to make them energy efficient and effective. The environment symbiotic shipping management system established from the angle of environment and sustainable development is a shipping mode with sustainable development and environmental protection in essence. Therefore, Green Maritime Logistics and Sustainable Port Development (GML & SPD) is an important driving force of the world economic growth and the main energy consumption unit and pollution source in the world. Under the new situation of global energy crisis and environmental deterioration, the international port community puts forward the concept of GML & SPD. GML & SPD is a developing concept and a sustainable approach that achieves a good balance between environmental protection and economic interests.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
