Deadline for manuscript  
submissions:

**31 December 2021**

### **Message from the Guest Editor**

Research in marine ecotoxicology focuses on the monitoring of the health status of marine habitats and their resources in relation to environmental and anthropogenic stressors. Seas and oceans act as sinks for many pollutants, from organic chemicals to plastics, which have been identified as detrimental for marine ecosystems and a priority for future studies to ensure sustainable development. In line with the United Nations (UN) 2030 Agenda, marine ecotoxicology will thus play a key role in the preservation of natural capital stocks in order to achieve the UN Sustainable Development Goals.

The aim of the Special Issue is to bring together the latest advances in marine ecotoxicology, in the hope of providing novel tools and solutions to reduce environmental hazards associated with human activities in terms of environmental monitoring, remediation of legacy, and contaminants of emerging concern, with an ecological perspective. All marine environmental commons, including coastal regions, the open ocean, and polar regions, are of interest.

### **Keywords:**

ecotoxicology  
marine environmental monitoring  
natural capital  
contaminants of emerging concern  
impact assessment  
sustainable development goals

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

**Journal Rank:** [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
