### Message from the Guest Editors

Dear Colleagues,

The idea of sustainability and urban development should be perceived jointly—the perception should cover design processes, organization, and planning processes used for the buildings' development as well as facility management and modifications of already existing building structures. This Special Issue is dedicated to the presentation of solutions aiming to fulfil four of the US Environmental Program aims: G 3—Good health and wellbeing, G 9—Industry, innovation, and infrastructure, G 11—Creating sustainable cities and communities, and G 13—Climate actions. The logic behind this choice of research areas is showing why urban space should be perceived as a holistic multilevel set of approaches, with emphasis on harmonious correlation between the humanmade and the existing natural landscape, as well as rehabilitation and efficient use of resources allowing to move toward sustainable development aims.

Keywords: mitigation of climatic changes; health and wellbeing in urban areas; sustainable urban areas; alternative building materials and technologies; housing crisis; interdisciplinary approach to crises in urbanized areas

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

**Journal Rank:** [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
