Message from the Guest Editors

Dear Colleagues,

This Special Issue (SI) explores academic, conceptual, methodological, or application-based research work conducted across the globe, with a strong connection to technological development and/or the analysis of mobility/transportation projects.

Suitable topics include but are not limited to:

- * Integration of spatial analysis and sustainability in transport and mobility
- * Regional and urban case studies of transport
- * Epistemological considerations for transferable information in mobility
- * Economics of transport and mobility
- * Cities as hubs of connectivity: ports, terminals, hot-spots
- * Urban-rural dichotomies and digitalization
- * Experimental analyses of eco-efficient transport
- * Comparative studies of transport emissions
- * Transport geography
- * Local lessons of smart mobility
- * Policy studies of mobility and transport
- * Social aspects of movement with respect to digitalization

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
