### **Message from the Guest Editors**

Concerned with the complex nature of human–environment interactions, this Special Issue aims to bring together multi-disciplinary insights to seek ways and means for achieving the sustainability of both human society and the environment. Within this context, as the guest editors of this Special Issue, we welcome contributions that advance the methods and techniques for characterizing environmental development and its socioeconomic impacts.

Overall, this Special Issue is open to a diverse set of perspectives with a common goal of providing the key information, technologies, and strategies for the sustainable development of the environment. Potential topics include, but are not limited to, the following: infrastructure, green areas, public spaces, land use/cover, new energies, agriculture and forestry, climate change, environmental management, environmental quality, environmental impact assessment, and policy practice and adaptation. Review papers are also welcome.
