Message from the Guest Editor

Even though municipal wastewater management is a well-established field, there are still many challenges that need to be faced so as to reach a stage of a real sustainable municipal wastewater management that would protect both the environment and humans' health, be energy-, water-, and cost-efficient, and have the ability to adapt to the current environment and the needs of the community.

Important challenges for the field of wastewater management that could contribute to the scope of the current Special Issue include: (a) new developments in wastewater treatment, (b) wastewater collection infrastructure issues and dealing with aged infrastructures, (c) effluent and sludge disposal and reuse, (d) new developments in respective policy and regulations, and (e) energy management.

The Special Issue welcomes original research and review papers focused on the latest knowledge and innovations in the field of municipal wastewater management in developed, developing, and underdeveloped countries, concerning large, small, pilot or experimental-scale systems. The papers must show originality and address knowledge gaps related to the scopes of the Special Issue.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and
Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
