Message from the Guest Editors

Dear Colleagues,

The global agricultural sector faces large environmental, economic, and social challenges. Agricultural production is straining natural resources while being further threatened by climate change. In response, smart technology and digitalization are increasingly being adopted by governments and development agencies. Given current agricultural transformations, the mitigation of environmental impacts has thus become important in a shift to more sustainable agriculture. Since food production and consumption account for about a third of a household's environmental impact, the role of consumers in achieving sustainable food and agriculture is attracting attention. Behavioral change, technological solutions, and public and private initiatives drive food consumption toward higher sustainability.

This Special Issue will focus on the latest research progress on the environmental impact assessment of agricultural and food sector and the relevant consumers' eco-friendly preference. The scope of this Special Issue covers a wide range of research on sustainable agriculture and consumption. Authors are invited to submit both articles and review papers.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
