Deadline for manuscript  
submissions:

**closed (20 April 2024)**

### **Message from the Guest Editors**

Dear Colleagues,

Concrete is the second most used substance in the world after water and is the most widely used building material. The production process for cement produces large volumes of greenhouse gas emissions, leading to a net 8% of global emissions. Other environmental concerns include widespread illegal sand mining, impacts on the surrounding environment such as increased surface runoff or urban heat island effect, and potential public health implications from toxic ingredients.

Electrical resistivity (ER) is an important criterion for evaluating cement-based materials and structural health monitoring since it allows the material to respond to strain or cracks. ER may be utilized to measure corrosion and durability and monitor the status of standard samples over time.

This Special Issue in Sustainability is dedicated to comprehensive reviews and original studies on resource use (e.g., nondestructive tests, piezoelectrical resistivity, and green synthetic nano conductive materials) of cementitious materials and concrete containing less common, non-conventional materials.

We look forward to receiving your contributions.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
