Message from the Guest Editors

Sustainable environments reflect effective resource management, including the natural environment of the land, water, and air, or the urban environment of buildings, cities, and infrastructure. Sustainability is critical for the human population, not only this generation but also for the generations to come. The transformation from traditional to sustainable environments requires interdisciplinary approaches in order to integrate knowledge and technologies, as well as examine, explore, and critically engage with issues and advances of urban environments. Research challenges in this field range from calibration, data acquisition, fusion, and modelling to efficient information extraction, visualization, and mapping. Therefore, the scope of this Special Issue covers research areas such as multi-sensor integration for sustainable urban environments, remote sensing for urban sustainability, and 3D city modelling, among others.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
