Deadline for manuscript submissions:

closed (30 November 2021)

Message from the Guest Editors

The current and future sustainability of humanity is intrinsically linked to the environmental and biophysical conditions on our planet. There is a widespread belief that these conditions are greatly compromised by anthropogenic activity and that, unless action is taken, irreversible change will be unavoidable. Alongside these challenges is a growing human population and the need for sufficient and nutritional food. Although recent international initiatives such as the 2030 Agenda for Sustainable Development and associated 17 Sustainable Development Goals recognize these challenges significant information gaps remain. In particular, there is an ever-growing need to balance the interdependencies and conflicts between economic, social and environmental systems so that sustainability across local and global scales and overall food security can be realized.

This special issue will address these issues and seeks contributions from colleagues interested in sustainable food production from economic, social and environmental perspectives as well as health promotion. Contributions which address synergies and conflicts between these issues are especially welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
