Deadline for manuscript  
submissions:

**31 January 2022**

### Message from the Guest Editor

COVID-19 has profoundly impacted how we move and gather. Learning to live with COVID-19, its mutations and successors, is a new variable in how we (re-)design resilience into both our existing and new communities, cities and transport networks. At the same time, integrated planning of transport and land-use needs to deliver clean air in the near term and net zero greenhouse gas emissions in the long term.

This Special Issue is focused on real-world case studies demonstrating research that addresses one or more of these combined challenges. Examples include technology and/or policy interventions in active transport infrastructure, public transport, freight, building design and refurbishment, the interface of energy and transport networks, digital twins, urban-/land-use planning, and the natural environment.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

**Journal Rank:** [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
