Message from the Guest Editors

In recent years, environmental citizenship and risk management in sustainability have received significant attention in academic fields. The explorations of theoretical and empirical studies on environmental citizenship of individuals/organizations are several aspects that deserve further consideration in environmental decision-making. Environmental citizenship is also a crucial concept to sustainable development. Risk management in sustainability, a new idea of risk management or an extension to the enterprise risk management (ERM) concept refers to a comprehensive risk management strategy caused by sustainability issues (such as climate change, resource depletion, and natural disasters). In addition to the shareholders' values, the concept of risk management in sustainability also incorporates the environmental and societal aspects for enterprise survival.

Therefore, we invite both theoretical and empirical evidence covering a wide range of multidisciplinary aspects related to environmental citizenship and risk management in sustainability.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
