Message from the Guest Editors

This issue is focused on “New Trends in Sustainable Approaches for Environmental Pollution Treatment” and aims to highlight the recent trends of the pollutants in the environment by using nanotechnology, photocatalysis, removal of emerging pollutants, membrane-based technologies, and construction management. The current issue objectives are to publish recent papers in the following scope.

The scope of this Special Issue includes but is not limited to:

1. Current and novel water and wastewater treatment technologies;
2. Desalination, photocatalysis, membrane-based technologies and adsorption of pollutants from water and wastewater;
3. The current situation of the construction management;
4. Life-cycle assessment (LCA) and techno-economic analysis for the proposed treatment technology.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
