Message from the Guest Editor

The aim of this special issue is to outline state-of-the art regarding applications of neuroscience-based techniques, especially in real settings, highlighting in particular current issues and future trends. They are in particular encouraged those studies in which it is clearly demonstrated how such neuroscience-based techniques could be used to enhance human safety and health.

Keywords

- neurophysiological measures
- machine learning
- signal processing
- biosignals
- safety
- health

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
