Pedestrian Safety and Sustainable Transportation

Message from the Guest Editors

The safe movement of pedestrians and passengers is an important component of a sustainable multi-modal transportation system. Therefore, the planning, design, management and protection of facilities for efficient, comfortable and safe walking in the local areas, major transport hubs and other public places is a challenge to policy makers, transportation engineers and planners, law enforcement and security agencies seeking to promote sustainable travel behaviour and create a safe liveable community. Particularly, the safety of pedestrians is a major challenge as there have been numerous fatalities and serious injuries resulting from vehicle-pedestrian crashes around the world. Likewise, as the urban population increases and city centres become increasingly crowded, the protection and movement of a large number of people in pedestrian malls, major transport hubs and other public infrastructures following natural disasters, terrorist attacks or other causes will be an important safety challenge in encouraging walking as a sustainable mode of travel.
Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

**Open Access**: free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility**: indexed by the Science Citation Index Expanded and Social Sciences Citation Index (Web of Science), as well as Scopus and other databases.

**Rapid publication**: manuscripts are peer-reviewed and a first decision provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 4.9 days (median values for papers published in this journal in the second half of 2018).
