submissions:

23 December 2019

Message from the Guest Editors

This special issue aims to discuss the state-of-the-art advances in various PV applications including inorganic (e.g., Si, CIGSSe, CZTSSe), dye-sensitized, organic, and organic-inorganic hybrid (i.e., perovskite) solar cells. Thus, we would like to invite authors to submit their original and high-quality research articles or review papers on novel PV material design/synthesis, device structure, and material/device processing, advanced characterization technologies and modeling toward high-performance/stable photovoltaic devices.

an Open Access Journal by MDPI

Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded and Social Sciences Citation Index (Web of Science), as well as Scopus and other databases.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 4.9 days (median values for papers published in this journal in the second half of 2018).
