submissions:

**1 October 2021**

### **Message from the Guest Editors**

The Sustainable Development Goals (SDG) 13, highlights the urgent need to take action to combat climate change, while SDG 14, emphasizes the need to conserve and sustainably use the oceans, seas and marine resources for sustainable development. This therefore calls for urgent action to protect our oceans and other water bodies from pollution. In the Arctic, the increase in temperature over the years has led to a higher rate of ice melting due to global warming. This phenomenon also means that previously ice-covered waters in the Arctic have gradually become ice free and presenting opportunities for shipping and natural resource exploration. Already there is substantial work on-going in the Northern Sea Route and the North-West Passage is also likely to follow suite. With these comes the risk of accidents from shipping and resource exploration, production, and transport. This means there is a likelihood of an oil spill in the Arctic and if this happens, the consequences on the Arctic marine ecosystem is dire.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

**Journal Rank:** [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
