Message from the Guest Editors

Competitive strategies that exclusively focus on the simplistic linear notion of production (design \Rightarrow manufacture \Rightarrow use \Rightarrow disposal) based on the consumption of critical resources are no longer viable in today's manufacturing settings. The 21st century's global business landscape calls for companies to integrate environmental considerations in all aspects of business operations to ensure sustainable and environmentally friendly processes and products. A shift towards more innovation-based business models that permit companies to enhance competitiveness along with sustainability impacts on the economy, society, and the environment is increasingly required. Such a transition, however, is already underway, led by the adoption of servitized strategies that contemplate the integration of differentiated services into manufacturing offerings as a means to innovate in manufacturing contexts, which is a phenomenon described as product-service innovation (PSI).

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
