Message from the Guest Editors

In line with the concerns about climate change, sustainability is a matter of growing interest for society in general. Due to the combined use of products and services, product–service systems (PSSs) usually provide smarter solutions with regard to material consumption, the product life cycle, and sustainability.

The aim of this Special Issue is to discuss and consolidate models, methods and practices for the development, offering and evaluation of Sustainable PSS solutions. Research areas may include (but are not limited to) the following:

- Models and practices for the development of Sustainable PSS solutions;
- Customization in Sustainable PSS solutions;
- Sustainable PSS case studies;
- Digital and Smart PSSs;
- PSS contributions to Sustainability and Circular Economy;
- PSSs from an economic and sustainable perspective;
- PSS contributions to the social dimension of sustainability;
- User feedback in the design of Sustainable PSS solutions;
- Life Cycle Sustainability Assessment on PSS offers;
