Deadline for manuscript  
submissions:  
**closed (31 January 2022)**

### Message from the Guest Editors

The inter-connectedness between community health and environmental change has emerged as a central theme within transdisciplinary research. For example, research pertaining to resilience, vulnerability, adaptive governance, transformative social learning, emergent structures, and the exposome are just a few examples of the cross-cutting dialogues that are engaging stakeholders from many different fields. Creating sustainable and healthy communities requires work at the policy, systems, and environmental levels that is collaborative in nature. This Special Issue aims to publish high quality papers that address how the public health system, via collaborative partnerships, have contributed to addressing the social determinants of health and root causes of chronic diseases; shaped policy; and prepared for future public health challenges in an effort to establish sustainable communities.

This Special Issue will supplement existing literature focused on the relationship between human health and sustainability.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
