Intelligent Information Systems and Services Based on the Internet of Everything

Guest Editors:

Dr. Sotirios Kontogiannis
MicroComputer Systems Laboratory (MCSL), Section of Applied and Computational Mathematics, Department of Mathematics, University of Ioannina, Ioannina, Greece

Dr. Theodosios Gkamas
Head of R&D at MicroComputer Systems Laboratory (MCSL), Section of Applied and Computational Mathematics, Department of Mathematics, University of Ioannina, Ioannina, Greece

Deadline for manuscript submissions:
closed (31 March 2024)

Message from the Guest Editors

Dear Colleagues,

We encourage contributors to design innovative Intelligent Information Systems, Decision Support Systems, Incident Response Systems, distributed data collection processes, and Deep-Learning/Machine-Learning architectures and algorithms provided as a service, associated with but not limited to:

- Distributed Systems' modeling, analysis, simulation, and verification of intelligent algorithms and low-power IoT distributed applications.
- Internet of Things, smart algorithms, provided as services over Distributed and Cloud-based Decision Support Systems.
- Hardware and software co-design of intelligent Distributed Management Systems solutions for the industry, agriculture, cities, infrastructures, healthcare, logistics, economy, energy, and other fields.
- Interactive low-energy protocols and middleware IoT/Distributed Systems, protocols, and services supporting Machine Learning and Artificial Intelligence in decisions and management processes.
- Design, evaluation, and implementation of novel IoT solutions incorporating Machine Learning, Deep Learning, and Data-Mining logic.

Special Issue

Editor-in-Chief

Prof. Dr. Marc A. Rosen
Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
