Deadline for manuscript  
submissions:

**closed (31 October 2024)**

### **Message from the Guest Editors**

Construction is one of the major industries that contribute to economic development generating significant revenues and producing significant gross domestic product for a country. However, it differs from many industries due to its unique operation and is often criticized for heavy resource consumption and unsustainable practices. Therefore, consistent improvements and innovations are necessary to effectively promote sustainable development in the construction industry. Over the past two decades, industries and academia have instigated numerous innovative approaches to benchmark sustainable practices within the construction industry. Despite numerous strategies and processes, the industry is still struggling to effectively embrace innovations necessary to facilitate a sustainable future. Therefore, the proposed Special Issue aims to investigate drivers, impediments, opportunities, and implementation that can facilitate innovations towards a truly sustainable construction industry.

We are pleased to invite you to submit your outstanding research including reviews, designs and technical papers on the construction industry innovations contributing to a sustainable future.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPus](#) / [SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
