Message from the Guest Editor

Sustainability is the capacity of equilibrium status for human civilization and biosystem to coexist. In order to attain this status, we can utilize various quantitative techniques, such as statistics, datamining, optimization, artificial intelligence, on top of policy-oriented approaches.

This Special Issue intends to collect the recent diverse studies in application fields of quantitative techniques for sustainability in our globe, whose applicable issues can include water, food, energy, infrastructure, culture, entertainment, disease, environment and climate change.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPus](#) / [SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
