Message from the Guest Editors

Dear Colleagues,

The Special Issue will focus on the most recent advancements in the hot topic of RNAi-based products research on this new class of bioproducts that appear promising in terms of a true revolution in sustainable agriculture and arboriculture; it will also focus on updated and debating reviews on this topic.

RNAi-based products, in particular RNAi-based biopesticides, could offer a suitable tool of plant protection in the context of international organization strategies, such as the European Commission Green Deal or the United Nations Environmental Program policies, wherein the use of chemical pesticides is increasingly subjected to restrictions, and a strong reduction of risks associated with hazardous pesticides is promoted, in view of an improved integrated pest management.

With the scope of exploiting the introduction of RNAi-based pesticides in integrated pest management, the purpose of this Special Issue is that of highlighting strength points and vulnerabilities of such technology and of its impact in sustainable agriculture, both in scientific and regulatory aspects.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
