Dear Colleagues,

Following a disaster and conflict-induced displacement, resettlement and relocation are integral parts of the recovery process. The most popular aspect of the recovery process is addressing the physical needs of the displaced community which may vary from providing basic necessities such as food, water, sanitary facilities to new houses and infrastructure facilities. Based on that assumption, ways to determine the success of resettlement are discussed, however superficially in some of the literature (Sridarran, 2018). However, this process goes beyond addressing the physical needs of the communities. It also includes addressing socio-cultural, livelihood and economic aspects of their lives (Amaratunga et.al, 2020). Relocation and resettlement often introduces a new built environment for the displaced communities which changes the pattern of the interaction among the displaced community and also with the host community.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
