Deadline for manuscript  
submissions:

**31 December 2021**

### Message from the Guest Editors

Humans generate several tons of waste every day, and concurrently, there is a growing concern over the impact of such waste on the environment and human health. Poor waste management systems on any scale can create environmental problems, health problems, and even economic concerns. However, this waste is also rich in water, nutrients, energy content, and materials that can be retrieved for various usages if managed properly. In this regard, recycling and reuse of waste play a vital role in conserving resources and achieving sustainable development. Utilizing resources sustainably has several advantages: 1) reducing pollution, 2) saving energy and mineral resources, 3) saving money, 4) reducing greenhouse gas emissions, and 5) reducing the amount of waste.

This Special Issue aims to gather contributions addressing the concerns of resource recycling and using recycled materials and their in-use performance and effect on human health. Papers discussing practices, modeling, health and safety issues which include identification of hazards, exposure assessments with a possible route of transmission, risk characterization, management, and communication are very much welcomed.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

**Journal Rank:** [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
