Deadline for manuscript  
submissions:

**31 October 2021**

### Message from the Guest Editors

Agri-food sectors need to change drastically to realize a more sustainable and healthier food system that responds adequately to challenges related to climate change, environmental pollution, biodiversity loss, social injustice, public health decline and frail food security and animal welfare.

We invite multidisciplinary perspectives on the meaning and content of transitioning responsibly to a more sustainable agri-food system. Both conceptual papers and case studies are welcomed. Questions we seek to answer are for example:

- What makes a transition towards a sustainable agrifood system ‘responsible’?
- Who are the relevant (market)actors involved? What is their role in transitioning responsibly toward more sustainable ways of working?
- How can behaviour change of the relevant (market)actors involved be realized in this transition?
- What can be learned about the practice of responsible transitions from regional, sectoral or niche case studies?
- Which friction and traction between stakeholder groups hamper or support responsible transitions?
- What is the role of markets in transitions toward a more sustainable agri-food sectors (taking into account that?

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

**Journal Rank:** [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
