Message from the Guest Editors

Dear Colleagues,

The dominant tourism discourse on sustainability and responsibility (focus, practice, understood as appropriate action) calls for a solid understanding of the process of how a responsible destination actually implements a sustainable tourism agenda and development, which this special issue aims to provide based on the ecological makings and theories called tourism ecology. Tourism and sustainable development have been a much studied and contested field of research. We are aware that the concept and interpretation of the development of tourism on sustainable, responsible and ecological basis—or in other words, ‘responsustainable tourism’ and ‘tourism ecology’—will be debated at least to the extent that landscape ecology was, back in the time. We look forward to have articles on any topic related to tourism development, sustainability, responsibility and ecology. Any interesting topics and themes are welcome connected with tourism responsibility and sustainability. There are no other strict thematic restrictions.
