Message from the Guest Editors

Pursuing sustainability goals means facing real global challenges such as transitioning from fossil fuels, equitable provision of renewable energy, and mitigating global warming and climate change issues. Energy demand is increasing because of population growth and a desire for a better quality of life that involves heating and air conditioning, travel, and consumer goods. Developing and using efficient, cost-effective, and practical solutions to address sustainability of energy supplies is necessary, while also maintaining and advancing life quality. Renewable energy sources (solar, wind, geothermal, biofuel, hydro, etc.) can help meet global energy needs and diminish the negative consequences of climate change and the threat of global warming.

This Special Issue aims to explore sustainability in the context of renewable energy provision to various communities, at different scales.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
