Message from the Guest Editors

The impacts of climate change are becoming so concerning. Despite the huge investments in technology to abate the problem, countries such as those in sub-Saharan Africa where resources available to invest in technological solutions are lacking are suffering disproportionately. To sustainably reduce the impacts of climate change at wider scale (i.e., both locally and globally), looking back at how people could cope with climate change impacts through the ecosystem services generated from ecosystems is crucial. For this reason, investments in ecosystem-based approaches to climate change both for mitigation and adaptation needs are growing.

This Special Issue focuses on building resilience and sustainability at the local level using the principles of social ecology as the founding attributes. This includes addressing the needs of the people and the ecosystem such that both thrive together, forging a sustainable pathway while ensuring the generation of ecosystem services for both people and biodiversity. The geographic focus is largely sub-Saharan Africa, but submissions from other regions of the world with relevant experiences are also welcome.

Special Issue

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
