Message from the Guest Editors

Currently, businesses are reaching a point where their activities are being affected by the Fourth Industrial Revolution and the associated digitalization. The advent of the digital age is causing changes in human resource management systems. Digitization of the socio-economic space provides management with new opportunities, streamlines the management process by reducing routine work, and saves time and money, while also having several risks and dangers for business and work resources.

This Special Issue will enrich the current published knowledge in the field of human resources management in the context of Industry 4.0 with an emphasis on solving problems in transport and logistics. Digital transformation is an urgent and relevant topic in which the development of knowledge based on empirical research is a knowledge gap. For this reason, empirical research in this area has high potential. On the other hand, the academic community faces a challenge because the transformation process is ongoing and presents several unanswered questions for all.

Special Issue

Editor-in-Chief

Prof. Dr. Marc A. Rosen
Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
