Message from the Guest Editors

This Special Issue focuses on the multiple and complex linkages among a series of socio-spatial phenomena and processes, which generally refer to socio-spatial and environmental inequalities, in relation to sustainability and sustainable environmental practices.

- Spatial dimensions of poverty and social exclusion;
- Socio-spatial aspects of desertification and land degradation;
- Socio-spatial aspects of climate change and climate crisis;
- Environmental inequalities at different spatial scales;
- Urban and regional inequalities and environmental practices and policies;
- Spatial planning and environmental sustainability;
- Spatial/environmental justice and sustainability;
- Socio-ecological systems and sustainability;
- Socio-spatial inequalities, social capital/trust, and environmental sustainability;
- Methodological innovations in socio-spatial and environmental inequalities;
- Mixed methods research on socio-spatial and environmental inequalities including qualitative geographical information systems (GIS).
