Deadline for manuscript submissions:

28 February 2022

Message from the Guest Editor

Public service delivery constitutes a process that ranges from detecting a need for a given service, through creating it, to delivering in the final form to the society. It includes administrative services (e.g., permits, concessions, e-services), social services (e.g., healthcare, public safety, education, culture), and technical services (e.g., public transport, water supply, waste management, energy supply). Delivery of such services is a complex process that faces many challenges (e.g., the diffusion of social problems, emergencies, joint decision-making, and service integration) and constraints (e.g., resource, organizational, financial). Local governments are crucial in dealing with these problems and delivering high-quality public services. They operate at the level of the community and are able to quickly identify and respond to their needs. Nevertheless, they do not have the ability to create, deliver, and improve public services without inter-organizational and inter-sectoral collaboration. This collaboration is essential because it increases the ability to meet social needs more easily, quickly, and efficiently than individual action.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
