

Sustainable Technologies and Developments for Future Energy Systems

Guest Editors:

Prof. Dr. Dinh Hoa Nguyen

International Institute for Carbon-Neutral Energy Research (WPI-I2CNER), and Institute of Mathematics for Industry (IMI), Kyushu University, Motooka 744, Japan

Prof. Dr. Hung Dinh Nguyen

School of Electrical and Electronic Engineering, NTU, 50 Nanyang Avenue, Singapore

Prof. Dr. Javad Khazaei

1. Department of Electrical Engineering, Penn State Harrisburg, Middletown, PA 17057, USA

2. Department of Architectural Engineering, Penn State University Park, PA 16802, USA

Message from the Guest Editors

To cope with the environmental, societal, and economic challenges of energy systems, while exploring the opportunities of recent advances in science and technology, this Special Issue aims to serve as a platform for energy researchers to present their recent works that contribute to deriving sustainable future energy systems. Both theoretical and practical research on technologies, analysis, and designs, which address the sustainability, complexity, efficiency, and resiliency of future energy systems, are welcome. Special attention will be given to studies on emerging technologies, such as machine learning and artificial intelligence, distributed ledger technologies, etc., for solving emergent challenges on the cybersecurity and resilience of energy systems under cyberattacks and natural disasters, which have not been accounted for in other Special Issues.

Deadline for manuscript submissions:

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
