31 December 2021

Message from the Guest Editors

This Special Issue aims to collect research and case studies of solid waste management in low and low-middle income regions, with a special focus on but not limited to the international cooperation framework. The implementation of small-scale treatment plants, the analysis of social behaviour, the implementation of collection and selective collection plans, the analysis of current and future scenarios through multi criteria decision analysis and life-cycle assessment, the evaluation of reliable solutions for waste treatment and possible waste valorisation, the application of pilot projects and actions in developing cities or rural areas, and strategies for reducing waste open dumping and open burning are the topics addressed in this Special Issue.

All waste fractions are welcome to be analysed, from municipal solid waste, to healthcare waste, construction and demolition waste, used tyres, agricultural waste, waste of electric and electronic equipment, among others. Moreover, the analysis of the informal recycling sector, as well as studies evaluating the involvement of waste pickers and scavengers in waste-selective collection systems, are encouraged.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
