Message from the Guest Editors

Transport infrastructures such as roads, and railways, commonly referred to as distributed linear assets, are critical to the survival and normal functioning of modern society. The majority of these infrastructures were conceptualized, designed and built by public sectors or government agencies without any in-depth analysis of the future needs of society and subsequent maintenance requirements, triggered by aging or accelerated aging by increased use or demand on services. The situation is further aggravated by climate change, bringing additional pressures on these infrastructures, associated with resource and budgetary constraints for maintenance.

Deadline for manuscript
submissions:

30 November 2021

Here in this Special Issue (SI), we aim to deliver methodologies, technologies, and tools for effective and efficient just-in-time decisions for the safety and maintenance of infrastructure. This SI is also aiming to investigate these capabilities through a set of real-world on-site demonstrators, assessing the condition of the infrastructure using advanced data acquisition methods using multiple data sources.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
