### Message from the Guest Editors

This Special Issue will comprise a selection of papers presenting original contributions to the analysis of entry and post-entry dynamics and the study of the determinants of self-employment survival, and policy evaluation cases. In this respect we will be interested not only in traditional entrepreneurship policies evaluations. Long-run effects are not accurately captured by conventional evaluations, which are usually performed a few years after the policies are implemented, and so capture only short-term impacts, but also in their long-run effects. Papers selected for this Special Issue will be subject to a rigorous peer-review process with the aim of rapid and wide dissemination of research results, developments, and applications.

Deadline for manuscript  
submissions:

**30 September 2021**
