Message from the Guest Editors

This Special Issue will comprise a selection of papers addressing the modelling of zero energy districts (nZEDs) for the energy, economic, and environmental analysis of sustainable urban development. Municipalities play a key role in the achievement of the international energy and climate aims. To date, most of the literature has regarded net-zero energy buildings (nZEBs).

This Special Issue has the ambition to propose innovative solutions for social housing districts, where the limited access to energy resources represents a critical condition to guarantee enough comfort to anyone.

Deadline for manuscript
submissions:

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
