Message from the Guest Editors

In this Special Issue, we invite studies focusing on non-technological solutions rather than technological innovations (Ellen MacArthur Foundation et al., 2016). Technological solutions alone are not sufficient to solve this issue (Cordier and Uehara, 2019). Furthermore, a solution must be feasible and effective in the context of SES. What kinds of non-technological solutions would be feasible and able to effectively reduce marine plastic pollution and contribute to a desirable SES? This is the research question addressed in this Special Issue, which will accept original and review research that addresses the following topics (non-exhaustive list):

- Social–ecological system modeling and simulation analysis;
- Governance (e.g., better regulation and control);
- Nudges (e.g., governmental information campaigns, information nudges, and default rules (Sunstein et al., 2019));
- Command and control policies (e.g., banning single-use plastic products and forbidding planned obsolescence of products);
- etc

Deadline for manuscript

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
