submissions:

closed (29 June 2021)

Message from the Guest Editors

Dear Colleagues,

The shock produced by COVID-19 has exposed certain places' institutional, social, economic and ecological vulnerabilities. At the same time, the pandemic has contributed to worsening territorial inequalities and the fragility of socio-economic systems. The consolidation of territorial disparities is one of the most significant risks, with socio-economic impacts and political–institutional costs that could compromise the functioning of advanced democracies. This Special Issue aims to analyse territorial experiences of social economy in response to the COVID-19 crisis and focuses on new practices that may help to reduce inequalities and poverty, enhance social, natural, and economic capital, and boost the sustainable development process in various places.

We invite you to submit proposals in the form of research articles, case studies and best practices. All submitted manuscripts should have a solid quantitative and qualitative scientific basis.

- inequalities and poverty
- urban–rural relationship
- local food policies
- local communities resilience
- social enterprises
- place-based approach
- landscape and planning
- circular economy

an Open Access Journal by MDPI

Editor-in-Chief

Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
