Deadline for manuscript  
submissions:

**15 December 2021**

### Message from the Guest Editors

The European Union, United Nations and frontrunners corporations have acknowledged the importance of social sustainability in moving forward. Therefore, corporations have developed tools to measure social value creation of their products, or follow certification schemes to promote social responsibility within. In addition, intergovernmental organizations, such as the UN, have developed tools to investigate social risks and benefits of products, systems and services, such as Social Life Cycle Assessment (S-LCA).

Due to marketing globalization nowadays, global, national and regional supply chain management becomes crucial for corporations and supply chains may result in significant environmental, economic and social effects on a product's footprint. Therefore, identifying relevant and important social risks and governance issues can assist decision makers with forming policies to improve the social performance of environmentally friendly products.

This Special Issue aims to explore the role of S-LCA and other social impact assessment methodologies in terms of:

supply chain management and environmentally friendly products;  
certification schemes;  
sustainability assessments.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

**Journal Rank:** [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
