Message from the Guest Editors

Dear colleagues,

Sustainability is a concept that integrates at least three dimensions: environmental, economic, and social. Energy systems are usually evaluated as key contributors for sustainable development, and thus the methodology used for their evaluation needs to address many indicators—some are quantitative, while others are qualitative. The real scenarios in this context are associated with uncertainty and vagueness, and Soft Computing can handle this ambiguity and supply solutions to complex real-life questions. Soft Computing can be understood as a set of methodologies and techniques such as fuzzy logic, expert systems, artificial neural networks, fuzzy neural networks, and genetic algorithms that—when working together and not in isolation—can help both the industry and policymakers to make the best decisions correctly. It is therefore a challenge to choose the best methodologies to accomplish this task. The aim of this Special Issue is to show recent and novel applications of Soft Computing in the field of sustainability assessment.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
