Sustainability Issues in Transport Infrastructure

Guest Editor:

Dr. Dawid Ryś
Department of Highway Engineering, Faculty of Civil and Environmental Engineering, Gdansk University of Technology, 80-233 Gdansk, Poland

Deadline for manuscript submissions:
closed (31 July 2020)

Message from the Guest Editor

Efficient transport cannot exist without resilient infrastructure. Going further, sustainable transport cannot exist without sustainable infrastructure. Some solutions in design and construction of infrastructure allow reducing adverse effects of transport on environment. Simultaneously, infrastructure should be durable and recyclable. This Special Issue aims to collect solutions which contribute to transport infrastructure being more durable and less inconvenient for the environment.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
