Message from the Guest Editors

Dear Colleagues,

Among the different socio-economic, scientific and integrated approaches toward a sustainable development, preservation and management of biodiversity is one of the less considered in scientific journals devoted to a broad readership. With this Special Issue, we want to provide an updated picture of the current challenges involving conservation biology, management and sustainability.

This Special Issue will comprise papers covering a wide range of aspects related to wildlife conservation and sustainability. In particular, we would like to highlight papers that cover successful histories in conservation that directly benefit local human populations. Papers addressing the positive impact of the establishment of protected areas, a reinforcement or a reintroduction of an endangered population, or some aspects of environmental education are especially welcome.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
