Message from the Guest Editors

The purpose of this Special Issue is focused on relating the challenges and opportunities that sustainable engineering is facing under the 2030 horizon to develop products, processes, services and built environments that coexist under the SDGs. To this end, the following potential topics of sustainable engineering are admitted for research work:

- Sustainable engineering model for the life cycle engineering of products, processes, services and built environments under the Sustainable Development Goals (SDGs) of the UN 2030 Agenda.
- Sustainable life cycle engineering in paradigms, frameworks, models and tools referring to the needs and analyses of sustainable experiences, ecodesign, environmental, economic and social life cycle analysis.
- Digitalization and smartization of the environmental, economic and social life cycle analysis. Analysis of the sustainability of the life cycle with the Sustainable Development Goals (SDGs)
- Sustainable reengineering: modernization and naturization of products, processes and the built environment; remediation of natural ecosystems; and resilience engineering.

Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
