Deadline for manuscript submissions:
30 June 2023

Message from the Guest Editors

Integrated crop production management (ICPM) as a holistic approach to sustainable agriculture considers the solution across the whole farm, including socioeconomic and environmental factors, to deliver the most suitable and safe approach for long term benefit. This means that carefully considered site selection, soil management, seed and planting material, crop rotation, biodiversity, carbon footprint, biocontrol, and human health is essential. ICPM is a method of farming that balances the requirements of running a profitable business with environmental responsibility. It includes practices that avoid waste, enhance energy efficiency and minimize pollution. By combining the best of modern technology with good farming practice.

The Keywords for the special issue:

- agriculture
- ICPM
- crop nutrition
- crop protection
- pollution
- waste management
- sustainability

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Sciences*) / CiteScore - Q1 (*Geography, Planning and Development*)
