Deadline for manuscript submissions:

**closed (15 November 2022)**

### Message from the Guest Editors

Dear Colleagues,

While sustainability challenges have become critical all over the world, companies are constantly struggling to develop smart, environmental-friendly and socially responsible logistics operations. Innovative green logistics practices may involve the use of environmental-friendly vehicles, shared logistics, consolidation centers, low-emission zones, smart waste collection strategies, cargo bikes, environmental/carbon footprint measurement and reduction strategies, to name a few. This Special Issue will examine the link between sustainability and logistics operations and will focus on the rise of new business, economic and technological trends shaping the future of sustainable economy. In this Special Issue, we are seeking to address research questions pertaining to sustainable logistics infrastructures, warehouse and transportation strategies, logistics information systems and smart ICT logistics applications, logistics equipment, optimization methods and techniques, best practices and case studies in all industries in support of the concept of sustainable economy and green logistics.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
